

New LOCK RING SENSORS Tell You When the Connection Is Complete and Your RigLock 10K/12.5K Is Secure and Ready.

RIGLOCK 10K/12.5K NEW LOCK RING SENSORS

The RigLock 10K/12.5K new LOCK RING SENSORS let operators know their RigLock is completely and safely closed, locked, and ready for well operations. The lock ring upgrade mounts directly to the RigLock body. It has a sensor for each cam lock to ensure proper closure which is indicated with the integrated SAFETY LIGHT INDICATORS on the control unit.

Know It Is Safe to Apply Well Pressure with New Safety Light Indicators

Safety light indicators lets operators know it is safe to proceed with well work.
